

Animals including humans

Year 1/2

Autumn Term

Animals including humans have offspring that grow into adults

lamb

sheep

baby

toddler

child

adult

teenager

egg

chick

chicken

The young of some animals don't look like their parents:

spawn

tadpole

frog

eggs

caterpillar

butterfly

pupa

Prior learning:

Identify and name a variety of common animals that are carnivores, herbivores and omnivores.

Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.

basic needs to survive:

food to eat

water to drink

air to breathe

shelter

To grow into healthy adults, animals including humans need:

good hygiene

exercise

right amount and types of food

Can I answer:

- Animals including humans have offspring which grow into adults. Give some examples.
- Name an animal that does not look like its parent
- Name some animals where eggs may be laid that hatch to young and grow into adults
- Name the basic needs of all animals including humans
- What else is important to grow into healthy adults?

Key vocabulary

offspring	A person's children or an animal's young.
reproduction	The process where new animals, humans or plants are made.
growth	The process of getting bigger.
exercise	This is when you move your body physically to get fit and remain healthy. Our heartbeat increases when we exercise.
breathing	This is what we do to get oxygen in our bodies.
hygiene	Keeping clean to prevent illnesses and the spread of disease.
germs	A very small thing that can cause diseases. We cannot see them with our eyes.
disease	An illness which affects people, animals or plants.

The Eatwell plate

This shows the different food groups that make up a healthy diet.
